Portfolio: kevinxu.dev

SUMMARY

Recent UCF Computer Science graduate with a focus on full-stack web development. Built and launched SenYu — a C2C marketplace for secondhand badminton gear — as an independent project, which gave me practical experience with the MERN stack, Stripe payments, real-time features with Socket.IO, and AI integrations using the Anthropic Claude API. Currently working in an operations role while looking to transition into a junior software engineering position where I can keep learning and contribute to a team.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, HTML5, CSS3, Python, Java, C++
Frameworks	React 19, Node.js, Express 5, Flutter, ReactJS
Database & APIs	MongoDB / Mongoose, REST APIs, Stripe API, Socket.IO, Anthropic Claude SDK
Tools	Git, GitHub, Figma, Cloudinary, Vercel, Railway, Vite, Postman

PROJECTS

SenYu Badminton Marketplace — Lead Developer · Independent Mar 2025 – Present

React 19 · Node.js / Express 5 · MongoDB · Stripe · Socket.IO · Claude AI · Cloudinary · senyubadminton.com

- Built and shipped the first US-focused C2C marketplace for secondhand badminton rackets — three trade modes (Free Trade, Stripe Checkout, Verified Trade with platform inspection), each with distinct order flows and auto-confirmation logic resolved at the API level (no cron jobs).
- Stripe handles four checkout paths (single item, cart, offer-based, VIP subscription); VIP sellers receive a 50% platform fee rebate computed server-side at webhook time.
- 6 Claude-powered features (Haiku + Sonnet): recommendations, listing quality scores (0–100), natural language search, negotiation hints, description generation, and admin dispute analysis.
- Real-time messaging via Socket.IO; admin panel with 14 routes (disputes, refunds, logistics, promo codes, site settings); 53 pages · 22 API files · 15 models · bilingual EN / Simplified Chinese.

Rostro Application — Front End Developer · UCF Team Project May – Dec 2022

Flutter · Firebase · Google Maps API · github.com/Face-Recognition-App-SD/frontend-Mobile

- Built Flutter front-end for facial recognition login, converting Figma designs into responsive UI components.
- Integrated backend APIs for facial recognition and email verification; tested across Android versions.

HandyMan Application — Front End Developer · UCF Team Project Mar – May 2022

ReactJS · Node.js · Google Maps API · github.com/NaimShaqqou/HandyMan-COP4331

- Built ReactJS front-end for service search with Google Maps integration.
- Implemented login and email verification UI with inline validation.

Contact Management App — Front End Developer · UCF Team Jan – Mar 2022

HTML5 · CSS3 · JavaScript · github.com/MatthewMcK17/COP4331C-SmallProject

- Created responsive web pages with form validation and backend data integration.

EXPERIENCE

Operations Support & Data Specialist Jul 2025 – Present

3H Pharmaceuticals LLC · Orlando, FL

- Maintain and audit the company-wide ERP system, ensuring data integrity and operational accuracy across departments.
- Build internal documentation and reporting workflows; provide on-call technical support across hardware, software, and inventory systems.

EDUCATION

University of Central Florida (UCF) 2019 – 2022

B.S. Computer Science · Orlando, FL

Valencia Community College 2015 – 2018

A.A. Electrical & Computer Engineering · Orlando, FL
