

Zhichen (Kevin) Xu

Software Engineer · Full-Stack Developer

Orlando, FL · 321-332-5472 · zhichenxuucf@gmail.com · Portfolio: kevinxu.dev
linkedin.com/in/zhichenxu041697 · github.com/kevinxzc2020

SUMMARY

Software engineer with a B.S. in Computer Science from UCF and hands-on experience in full-stack web development. Skilled in ReactJS, Node.js, Express, and MongoDB — converting Figma designs into production-ready interfaces, integrating REST APIs, and shipping end-to-end features. Currently maintaining ERP data integrity at a pharmaceutical company while independently architecting SenYu, a C2C marketplace website.

TECHNICAL SKILLS

Languages JavaScript (ES6+), TypeScript, Dart, Java, Python, C++, HTML5, CSS3

Frameworks ReactJS, Node.js, Express, React Native, Flutter, Expo

Data & APIs MongoDB Atlas, Firebase, REST APIs, JSON, Postman

Tools & Platforms Git, GitHub, Figma, Android Studio, Google Maps API, Vercel, Render, Vite

PROJECTS

SenYu Badminton Marketplace — Lead Developer · Independent Mar 2026 – Present

React · Node.js · Express · MongoDB · Stripe · Socket.IO · Claude AI · senyubadminton.com

- Architecting a C2C marketplace website for premium secondhand badminton equipment from scratch — full product ownership from concept to launch roadmap.
- Designed database schemas, real-time listings, user authentication, and a responsive UI tuned for serious players.

3H Pharmaceuticals Corporate Website — Developer · 3H Pharmaceuticals May 2026 – Present

Shopify · Liquid · HTML5 · CSS3 · JavaScript · 3h.life

- Built and shipped 3H Pharmaceuticals' corporate Shopify site, migrating the company from a legacy Wix setup in roughly one week.
- Self-designed every page layout and shipped fully custom Liquid templates — no third-party themes or apps.

Rostro Application — Front End Developer · UCF Team Project May – Dec 2022

Flutter · Firebase · Google Maps API · github.com/Face-Recognition-App-SD/frontend-Mobile

- Developed Flutter front-end for facial recognition login and user registration.
- Built responsive UI components from Figma designs.
- Integrated with backend APIs for recognition and email verification.

HandyMan Application — Front End Developer · UCF Team Project Mar – May 2022

ReactJS · Node.js · Google Maps API · github.com/NaimShagqou/HandyMan-COP4331

- Built ReactJS front-end components for service search with Google Maps API.
- Implemented login and email verification UI.

Contact Management App — Front End Developer · UCF Team Project Jan – Mar 2022

HTML5 · CSS3 · JavaScript · github.com/MatthewMcK17/COP4331C-SmallProject

- Created responsive web pages using HTML5 and CSS.
- Wrote JavaScript form validation; integrated with team-built backend via HTML form actions.

EXPERIENCE

Operations Support & Data Specialist Jul 2025 – Present

3H Pharmaceuticals LLC · Orlando, FL

- Designed and shipped the company corporate website (3h.life) on Shopify, building every page with custom Liquid templates.
- Maintain and audit the company-wide ERP system, ensuring data integrity and operational accuracy across departments.
- Build internal documentation, system updates, and reporting workflows that reduce manual coordination overhead.
- Provide on-call technical support for daily pharmaceutical operations, troubleshooting issues across hardware, software, and inventory systems.

EDUCATION

University of Central Florida (UCF) 2019 – 2022

B.S. Computer Science · Orlando, FL

Valencia Community College 2015 – 2018

A.A. Electrical & Computer Engineering · Orlando, FL
